m-claims/medications-from-claims

Review historically data from claims:

- **Medications** with Quantity, Supply, and Prescriber
- **Diagnoses** with Condition and date recorded
- **Procedures** with the description, source, and date
- **Encounters** with the source, claim type, reason and date

The screenshot shows the HIE InContext interface for patient GILBERT GRAPE. A 'Care Alerts' modal window is open, displaying a list of care coordination events. The background shows a navigation menu with categories like PATIENT INFORMATION, MEDICATION MANAGEMENT, CLINICAL DATA, CARE COORDINATION, SOCIAL NEEDS DATA, and DATA FROM CLAIMS. A table on the right lists roles such as Care Manager and Primary Care Physician.

Date	Alert Description
AAMC (2022-05-10)	GILBERT GRAPE has been enrolled into the TEST for Referrals at AAMC on 05/09/2022;
MOM Care Plan Follow Up (2022-04-26)	This patient has been discharged from the MOM Model program on 2022-04-26. Previous records associated with their enrollment, including their most recent care plan and discharge information can be found under the Health Records tab of ULP.
ENS_AMRGRFRL (2022-01-12)	GILBERT GRAPE has been referred to Amerigroup's Diabetes Prevention Program - Healthy Living, Healthy You, on 11/10/2021;
ENS_MCHDR (2021-11-18)	Gilbert Grape has been enrolled into SMCHD Smoking Cessation Program on 9/9/2021; There are additional notes from this patient's visit under the Clinical Notes tab of Health Records.
ENS_BNWLRF (2021-11-18)	Gilbert Grape has been enrolled into the Medically Tailored Meals at Bethesda NEWtrition & Wellness Solutions on 9/19/2021; There are additional notes from this patient's visit under the Clinical Notes tab of Health Records.
ENS_STAGREF (2021-10-04)	Gilbert Grape has been enrolled into the St Agnes Diabetes Prevention Program (DPP) on 9/21/2021. For information contact St Agnes DPP at 667-401-3613 or DiabetesPreventionProgram@ascension.org; There are additional notes from this patient's visit under the Clinical Notes tab of Health Records.
ENS_UMHIFMI (2021-10-04)	Gilbert Grape has completed his/her Monoclonal Antibody Home Infusion on 8/26/2021; There are additional notes from this patient's visit under the Clinical Notes tab of Health Records.

Review Care Coordination:

Care Team

Provides a list of organizations that are currently subscribed to receiving information about the patient.

Care Alerts

High priority care coordination information meant for the most complex patients who frequent hospitals and practices. These are generally written by physicians or care managers who have previously seen the patient.

CARE COORDINATION: Encounter Notification Service (ENS)

CRISP currently receives information pertaining to **ER visits and inpatient admissions** in real-time from acute care hospitals in the region.

- All Maryland acute care hospitals
- All D.C. acute care hospitals
- All Delaware acute care hospitals (in partnership with DHIN)
- 17 Northern Virginia acute care hospitals (in partnership with ConnectVA)
- Most West Virginia acute care hospitals

CRISP DC Critical Infrastructure: Encounter Notification Alerts

Review Encounter Notifications:

- Be notified when your patient is hospitalized in any regional hospital
- Receive special notifications regarding ED visits that are potential readmissions
- Create additional filters based on patient complaints, diagnosis codes and discharge dispositions

What is the Community Resource Information Exchange (CoRIE) Initiative?

CoRIE is a Partnership

- DHCF, CRISP DC, DC Primary Care Association, and DC Hospital Association are collectively known as 'CoRIE Partners'
- Committed to supporting and sustaining technical solutions and enabling coordinated whole person care across health, human, and social service providers in the District.

CoRIE is a set of 3 technical functionalities to address SDOH

- Screening for social risks and share dispositions
- Lookup resources through a centralized community inventory (CRI)
- Refer to appropriate community and support services
- Together these 3 functionalities enable data sharing among health system stakeholders to address individuals' social needs.

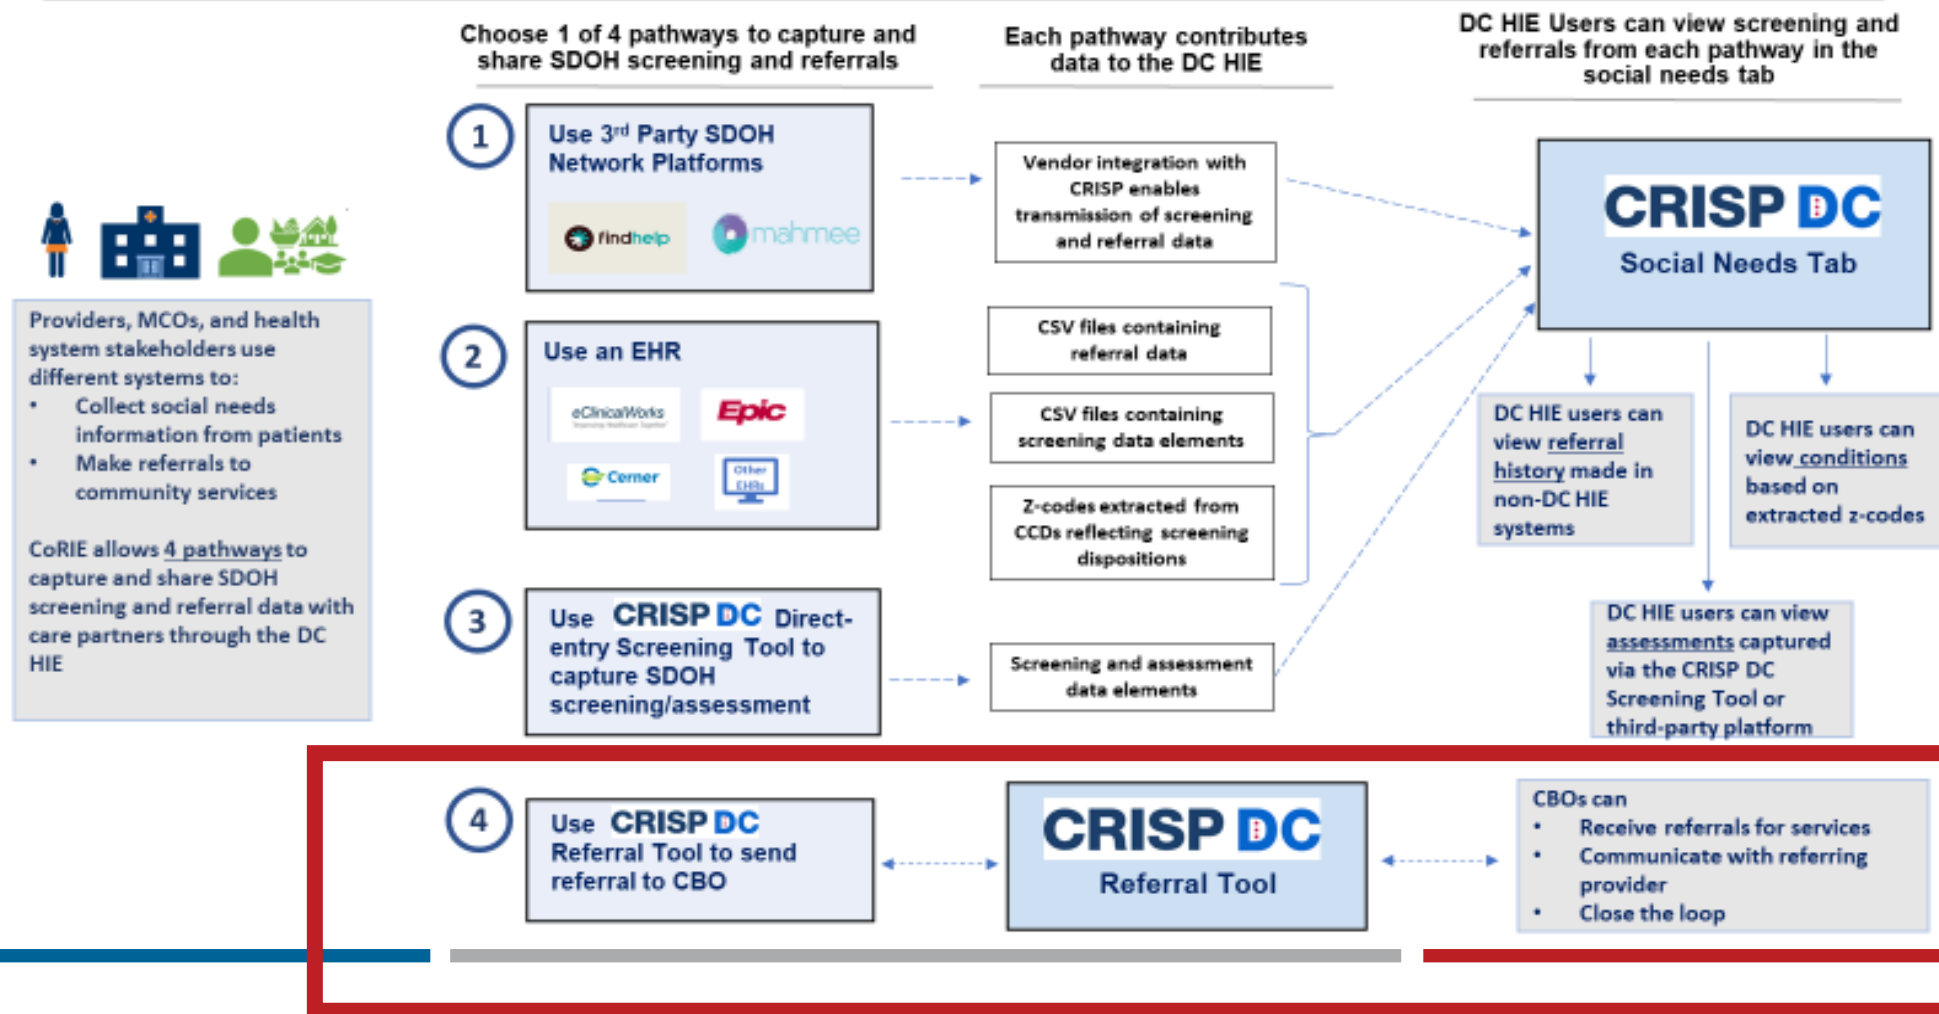

CoRIE is a Vendor Agnostic Approach

- Enables screening and referral information to be shared and displayed regardless of how it was collected
- Ensures care partners can view the same information via DC HIE regardless of the vendor platform they use

CoRIE is an Interoperable System within the DC HIE

- Digitally connects care partner, including health and social service providers, through the DC HIE health data utility
- Provides shared services across the region
- Fosters a culture of shared responsibility for ensuring the availability and quality of actionable information

CoRIE is designed to enable social needs screening and referral through DC HIE infrastructure *without* requiring a single District-wide platform

CoRIE Referral Tool

- Two (2) 3rd party vendors (FindHelp, Mahmee) signed agreements to display referral data
- FindHelp will share referral history starting with MedStar Regional hospitals

- Initial pilot conducted with Gerald Family Care in late 2020.
 - More than 70 referrals sent to Giant Nutrition for *Virtual Services for Heart Health, Prediabetes and Diabetes, and Healthier You.*
 - Ability to tracking follow-up to nutritional counseling services and view follow up notes
- Closed loop referral tool went live and in use by CRISP clinical users and community-based organizations
 - 12 healthcare organizations are making referrals to CBOs
 - 18 DC CBO programs available to receive and close loop on referrals

- CRISP Referral History Subtab built under Social Needs Tab and available to DC HIE users

FY22

- Continue the technical integration with FindHelp to enable third-party MedStar Regional referrals to be added to the CRISP HIE and viewable at point of care.
- Engage and implement technical integrations with other third-party SDOH network platforms to make screening and referral data available within the CRISP HIE
- Expand userbase to enable more CBOs to receive and respond to referrals through the free CRISP DC referral tool
- Onboard more DC HIE user healthcare organizations make referrals to CBOs
- Engage directly with DC CBOs, coalitions, and agencies to onboard more CBOs across various SDOH domains (food, transport, housing, legal, etc.) to the CRISP referral tool
- Enable CBOs to make referrals in Fall 2022
- Social Needs Tab, Referral History Subtab data to be made available to all DC HIE users

CRISP Program Referral

Guidance And Advisories ▾

Due to extremely limited supply, referrals for monoclonal antibody treatment have been paused to allow for treatment to older adults in skilled nursing facilities. Please consider an alternative therapeutic for high-risk patients such as Paxlovid or Molnupiravir.

Note : Test referral for email notification

CRISP DC has the following CBOs and programs available for referrals on the closed-loop referral tool:

Giant Food Nutrition:

- 6 Steps to a Healthier You Webinar (Virtual Class)
- Eating for Heart Health (Virtual)
- Eating for Prediabetes and Diabetes (Virtual)
- Healthy Meal Planning (Virtual)
- Mindful Eating (Virtual)
- Virtual Consultation (English and Spanish)
- Virtual Store tour

Bethesda NEWTrition & Wellness:

- Diabetes Prevention Program
- Diabetes Self-Management & Education Program
- Medical Nutrition Therapy

DC Hunger Solutions

- SNAP Assistance
- WIC Assistance

Sorogi

- DPP
- Diabetes Self-Management and Education Program
- Remote Patient Monitoring Program
- Self-Measured Blood Pressure Program

YMCA of Metro Washington

- Blood-pressure Self Monitoring
- DPP
- Cooking and Nutrition Classes
- Medical Nutrition Therapy

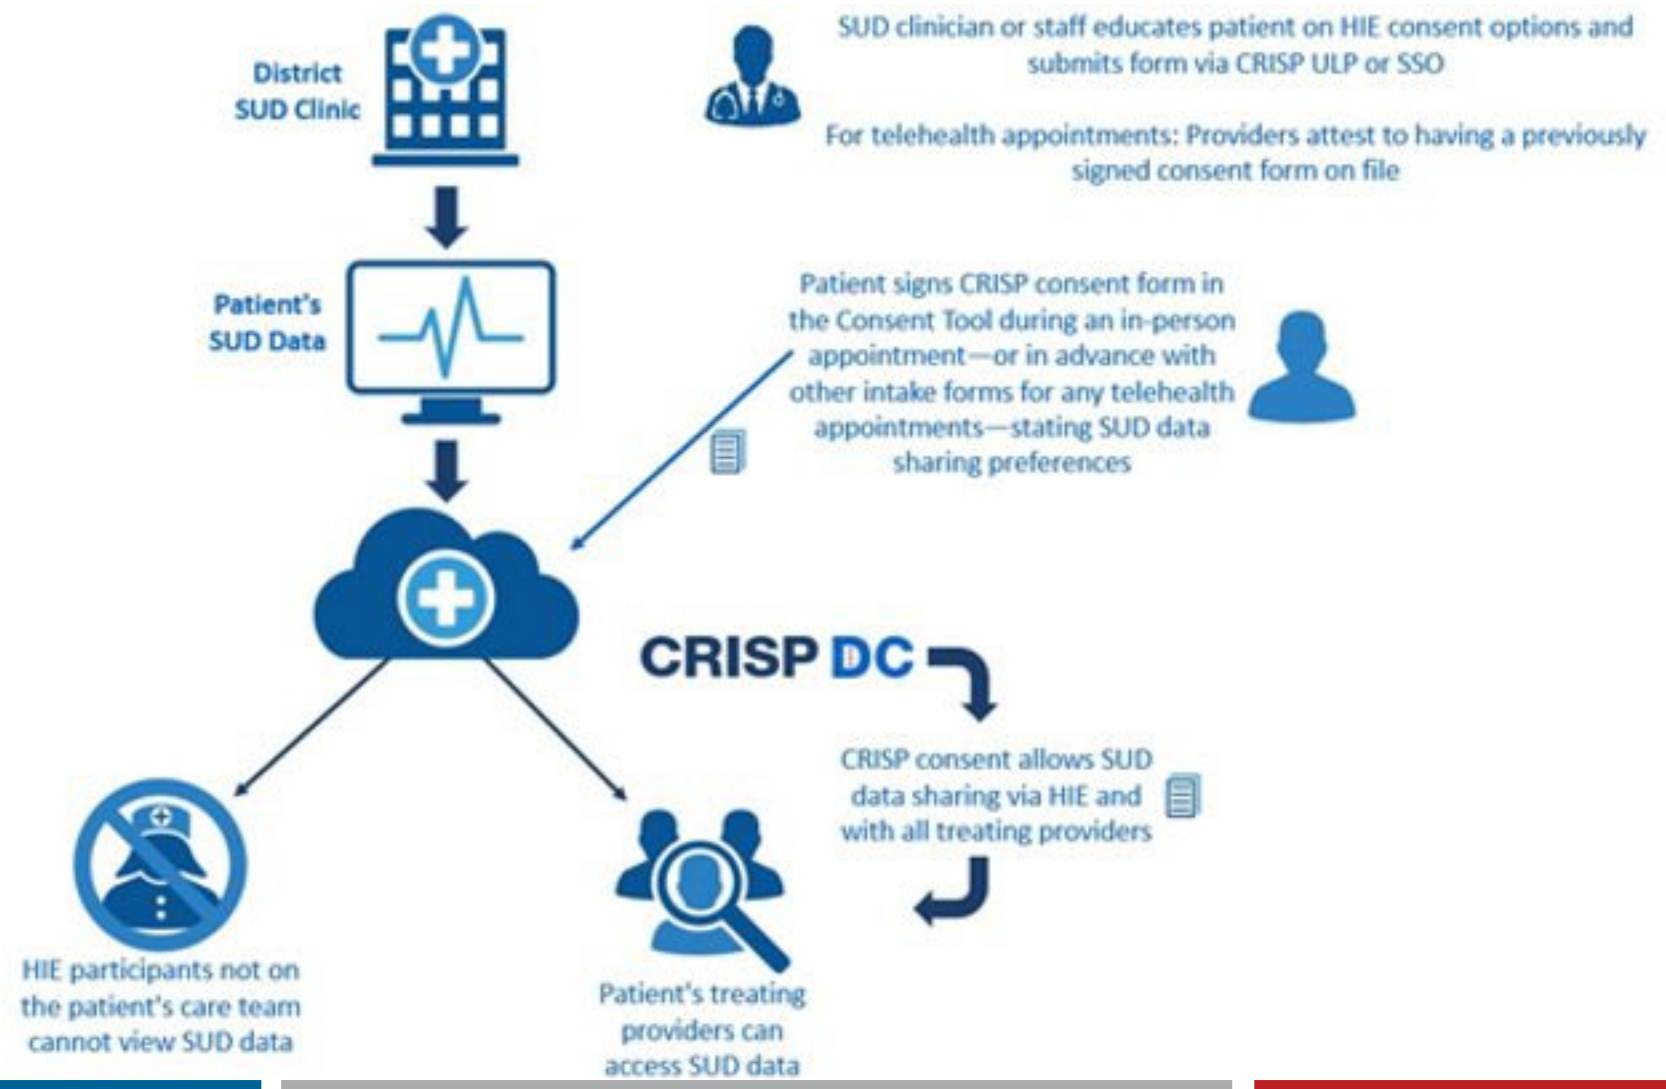

If your organization would like to:

- Access the closed-loop referral tool as a healthcare organization who wants to make referrals
- Onboard your CBO and its programs to the referral tool
- Recommend community-based organizations (CBOs) whose programs could be on the closed-loop referral tool

Please reach out to Aida Semere, CRISP DC Referral Tool Project Manager (aida.Semere@crisphealth.org), who will work with your organization to onboard and train your staff and assist with the onboarding process for adding CBO programs onto the closed-loop referral tool.

- The CRISP DC Consent Tool is a platform for providers and staff to register patient consents to share 42 CFR Part 2-protected data.
- **What is my patient consenting to?**
 - To allow their Substance Use Disorder (SUD) treatment provider to share information about their SUD treatment with the DC Health Information Exchange (HIE).
 - The HIE will then share it with other members of the patient's health care team who participate with CRISP HIEs
 - Including Maryland, DC, West Virginia, Connecticut, Alaska and any HIE affiliates in the future
- The pilot of the consent management tool began in April 2021:
 - 11 initial sites have been trained and credentialed to access the tool
 - 316 consents have been registered to date
 - <2% of consents registered have elected to share only their care team information, >98% have elected to share all of their SUD treatment data
- CRISP DC is prepared to make this tool available to all clinical users of CRISP by July 2022

- Easy integration into existing workflows and clinical systems
- Electronic signatures for patients to opt-into sharing their 42 CFR Part 2 protected data
- Attestation button allowing providers to register patient's consent that has been captured outside of the tool, either electronically or on paper (intended for telehealth patients)
- Flexible expiration dates for consent registration, with a default expiration date of one year from registration date
- Provider and payer specific forms with multiple patient consent options to share all of their SUD treatment data (treatment plan, medications, lab results, clinical notes) or only the care team's contact information

- Providers can search for a patient, then launch the consent tool through the DC Portal
- Providers must attest to providing patient education and verifying patient identity before submitting the consent and the patient may revoke their consent at any time

The screenshot shows the CRISP DC web interface. At the top, there are navigation links for "Consent" and "Consent History". The main heading is "Consent to Disclose My Substance Use Disorder Treatment Information" with a "Next" button on the right. Below this, there are two sections: "From" and "To Whom", both containing authorization text. The "From" section states: "I authorize disclosure by any of my past, present, and future Substance Use Disorder treatment providers that share data with CRISP." The "To Whom" section states: "I authorize disclosure to CRISP Shared Services affiliate HIEs, who may then disclose the information to any of my past, present or future providers involved in my care who participate with the HIE. I can request a list of all providers who have received my information by going to <https://disclosures.crisphealth.org>." Below these sections is a blue header "Type and Amount of Data". Underneath, there is a "Purpose" section stating: "The information shared will be used to help my health care team coordinate my care and provide health care treatment." Finally, there is a "Consent Options" section with two radio button choices: "Disclose All Substance Use Disorder Treatment Data" (with subtext: "This could include my treatment plan, medications, lab results and clinical notes about my care.") and "Disclose Substance Use Disorder Treatment Providers Contact Info Only" (with subtext: "The information will include only my Substance Use Disorder treatment provider's name and contact information.").

- Patients indicate their consent preferences and electronically sign the form or submit an additional paper form, for telehealth visits

Discussion

1. To what extent did the session meet the stated objectives?
(1-not at all to 5-met all objectives)
 - Learn about the portal interface.
 - Discuss the status of CoRIE and the closed-loop referral tool.
 - Understand what tools are coming soon, including consent management.
 - Discuss and address grantee questions, challenges, and opportunities for improvement and implementation.

2. How would you rate the session overall?
(from 1-5, where 1 is poor and 5 is excellent)

We are here to help you !
